## **BULLETS TO BE USED IN RESPONDING TO PUBLIC INQUIRIES RE: GCPT EFFORTS**

- \* Based on the work plan that EPA negotiated with Republic Services, a cover is not required for the equipment or the ground where the work is being conducted.
- \* This is an engineering study only – there will be no construction in this phase. Results from this phase will be completed by the end of Dec.
- \* There will be minimal intrusion or disturbance of the ground.
- \* The equipment and technique being used for this exercise don't typically generate dust. However, EPA staff will be onsite to monitor all actions to ensure that dust suppression is completely managed.
- \* The state of MO is also monitoring for gamma radiation on a continuous basis.
- \* Once again, EPA will be on site to monitor the entire exercise.
